

## Manufacturing Statement

Concerning

*Buy American Act*

and

*American Recovery and Reinvestment Act of 2009 (ARRA) Compliance*

By

National Certified Fabricators, dba Griswold Water Systems

### Summary

All Filtration and Physical Water Treatment products manufactured by Griswold Water Systems are manufactured in the United States of America and are fully compliant with both the "Buy American Act" legislation of 1964 and the "buy American" requirement of §1605 of the American Recovery and Reinvestment Act of 2009.

### Additional Information:

For over 20 years National Certified Fabricators, dba Griswold Water Systems, has been proud to manufacture separators, separator systems, chemical bypass feeders, and sand filters at our ASME certified weld shop and UL certified panel shop in Corona, CA. Additionally, we manufacture and assemble our electronic Physical Water Treatment device at our facility in New Smyrna Beach, Florida. These products include, but are not limited to:

**SBC** – Electronic Water Treatment used to control scale and bacteria and contribute to low corrosion rates

**CSS Series** – Centrifugal Separator Systems with timed blowdown

**CSR Series** – Centrifugal Separator Systems with continuous purge through a bag filter

**TSS Series** – Tower Sentry Systems which include side-stream filtration, electronic water treatment (SBC), conductivity control and blowdown, and other accessories

**SF Series** – Steel Sand Filters with timed backwash

**All Pot Feeder Series** - Chemical By-Pass Feeders with accompanying accessories
